As a leading, innovative company in logistics real estate, WDP takes its responsibility and clearly commits to ESG. The DJSI are float-adjusted market capitalization weighted indices that measure the performance of companies selected using environmental, social and governance (ESG) criteria. The index family is comprised of global, regional, and country benchmarks.

About S&P Dow Jones Indices and S&P Global Corporate Sustainability Assessment (CSA)

S&P Dow Jones Indices is the largest global resource for essential index-based concepts, data and research, and home to iconic financial market indicators, such as the S&P 500® and the Dow Jones Industrial Average®.

The DJSI World applies a transparent, rules-based constituent selection process based on the companies' S&P Global ESG Score resulting from the annual S&P Global Corporate Sustainability Assessment (CSA). The CSA consists of a rigorous questionnaire assessing both public and non-public data submitted by participating companies. This year, 13,800 companies were invited to complete the CSA. Of those, 3,519 companies were eligible for selection into a Dow Jones Sustainability Index (DJSI). Of all invited companies, 2,480 have submitted, representing over 48% of global market capitalization.

"In addition to a first recognition at European level, being considered a best-in-class company at global level is a true token of WDP's efforts to integrate ESG in its operations. Sustainable real estate is the only way forward – a conviction which we will continue to promote and lead by example."
